FROM MAXWELL STRESSES TO PHOTON-LIKE OBJECTS

VDM Verlag Feb 2010, 2010. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Photons are real massless time-stable and spatially finite physical objects with an intrinsically compatible translational-rotational dynamical structure. They carry energy-momentum and propagate as a whole in a translational-rotational periodic manner by the speed of light. The corresponding integral action for one period T is given by the Planck constant ' $h = ET$ ', where ' E ' is the full energy of the photon, and all photons carry the same...
