Not illustrated. 1995-10-01 Excerpt: . . . the Campbell spray booth involves the use of air curtains; the worker stands outside of the booth and sprays through the air curtain. The air curtain provides a barrier between the worker and the solvent emissions inside the booth resulting from coating the piece. A pilot system has been built, and a full-scale system has been designed. Mobile Zones Associates has developed a device which, when installed on a spray booth, enables the worker(s) to spray coatings from a partially enclosed mobile work platform. The worker stands inside a cab, the movement of which is controlled from inside the cab by the worker. Within the Mobile Zone cab, fresh ventilating air passes across the painter from an open moving window at his rear. The remaining section of the mobile work platform is ventilated using recirculated air. The Mobile Zone design contrasts with a conventional spray booth,...
