Reviews

Great electronic book and useful one. It can be writter in straightforward terms rather than difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Excerpt: .to hunt a flock over thoroughly for ewes that are in heat. Only one leap should be allowed; as much care being taken in this respect as is taken by the owner of a thorough-bred horse or bull. Four or five ewes are as many as the ram should be allowed to serve in one day. Probably less would be better, although I have never detected any difference between the lambs in either case. As soon as the ewe is served, let her be put out and kept out for at least twenty-four hours. Those who have their ewes numbered can register the time that each ewe is served, so that she can be cared for at the proper time of dropping her lamb--about five months after service. The ram should be fed all the oats he will eat, twice a day, while he is being used, and should be kept in a yard or field by himself when not in use. This manner of using a ram may seem too particular to some who have never tried it, but if closely followed, the breeder can usually depend on having his lambs come strong and healthy. Cure for Kidney-Worm and flange.--A correspondent of the American Farm Journal thus gives his experience in treating kidney-worm, and mange, in hogs: --. I noticed that one of my hogs, a large Chester white sow, was a little weak in the back. On, examining her, I found that it...
