

Scenario Three: Solving America's National Debt, Social Entitlements and Economic Problems

By Terence Rajendra Ramnarine, Katherine Renee Ramnarine

Dog Ear Publishing, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Let's raise capital for the purpose of eliminating the national debt. Eighteen trillion dollars divided by twenty-five per each preferred share equals 720 billion shares. It will be bought and sold to US-born investors and American companies. The US Treasury will pay back any national foreign obligation owed. At least a one-for-one-thousand reverse split will be conducted, raising values upward of \$25,000 per share, lowering outstanding shares to 720 million shares. Debt solved. Terms and timing of one or more reverse splits will be disclosed in the red herring and final prospectus given to each shareholder. These splits will be completed at the US Treasury's discretion with no further shareholder approval required. Why pay interest on foreign debt when American companies can benefit from quarterly dividend payments on privatized debt? Huge upsides await investment companies. 720,000,000 shares x \$25,000 per share ---- \$18,000,000,000,000 360,000,000 shares x \$50,000 per share ---- \$18,000,000,000,000 180,000,000 shares x \$100,000 per share ---- \$18,000,000,000,000 As corporations make gains, they can acquire remaining shares or merge. Preferred shares will be...
